SEED THE BEST GROWN
FOR US FOR 20 YEARS

"Savage's the Best on the Coast"

READY NOVEMBER 15, 1926--APRIL 30, 1927

Savage's Frost Proof Cabbage Plants are the best on earth, because they are grown in open fields here in Virginia from best seed grown for us and planted after September 22nd, on a peninsula of land known as the Eastern Shore of Virginia, lying between the Atlantic Ocean and the Chesapeake Bay. Where Climate is right for Frost Proof plants, they live better, grow better and are for every reason superior for transplanting here or anywhere, especially North, to plants grown South in the warm early climates of the Carolinas and Georgia.

Have you ever looked at it in this light?

Prepared to fill all orders promptly.

Big Boston and Iceberg lettuce plants, 50 cents 100 by P. P.
